Art Unit: 3653

1. In view of newly found prior art, the finality of the Office action of 12/12/02 is withdrawn.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 6-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over British Patent #2268133 in view of Australian Patent #9474438, Swiss Patent #680903 and French Patent #2598362.

British Patent #2268133 discloses a substantially similar wheelchair ramp. British Patent #2268133 does not attach or form part of a lowered floor, and does not disclose a vertical position of use. Australian Patent #9474438 discloses a lowered floor. Swiss Patent #680903 and French Patent #2598362 disclose a vertical position of use. It would have been obvious to a mechanic with ordinary skill in the art at the time the invention was made to provide these features to the primary reference. The motivation is to easier transfer a wheelchair.
